Profit: Profit is what keeps a company going and is the main aim of most businesses. Normally a business will try to obtain a satisfactory level of profits so they do not have to work long hours or

pay too much tax.; Increase added value: Value added is the difference between the price and material costs of a product. E.g. If the price when selling a pen is \$3 and it costs \$1 in material, the ...

Examples Of Description Of Mechanism. A mechanism is generally defined as any object or system that has a working part or parts. Most often the term suggests tools, instruments, and machines. But other examples of mechanisms could be the human body and systems like the universe or a city, which is composed of parts that work together like parts of a machine.
