A population is the whole set of items from which a data sample can be drawn; so a sample is only a portion of the population data. Features of a sample are described by statistics.. Statistical methods enable us to arrange, analyse and interpret the sample data obtained from a population.

Statistics - mathsteacher.com.au

In statistics, one-way analysis of variance (abbreviated one-way ANOVA) is a technique that can be used to compare means of two or more samples (using the F distribution). This technique can be used only for numerical response data, the "Y", usually one variable, and numerical or (usually) categorical input data, the "X", always one variable, hence "one-way".
