Functions of the Endocrine System. Growth, metabolism, and tissue maturation. The endocrine system controls the growth of many tissues, like the bone and muscle, and the degree of metabolism of various tissues, which aids in the maintenance of the normal body temperature and normal mental functions.

Endocrine System Anatomy and Physiology - Nurseslabs

I love seeing that "lightbulb" moment when students realize that they've been making the endocrine system a lot harder than it needs to be. Which is why I was so surprised when I realized that I've never, ever explained the best way to study Endocrine diseases on this blog. After all, Endocrine is only about the ...
