In developed countries, follow-up for neonatal intensive care unit (NICU) patients is commonly performed at designated clinics. [1, 2] From their inception, NICU-related follow-up clinics have focused on outcomes of premature infants. Some clinics perform follow-up for medical conditions (eg, bronchopulmonary dysplasia, posthemorrhagic hydrocephalus); however, the intent in all NICU-related ...

Lichenoid reactions are seen as ulceration and desquamation of the oral mucosa, frequently associated with lichen planus-like white striae on the buccal mucosa. A link between oral lichen planus and drugs that reduce saliva flow is suggested, but the most recent study of such patients found that only 6.5% of the participants with oral lichen planus were taking such medications. 19 Stevens ...
