Achieve offshore structure compliance more quickly with the most comprehensive and up-to-date international design code coverage available. Improve design quality and predict offshore structural performance using a unified analysis environment that enables the efficient exploration of alternatives.

### **SACS - Offshore Structural Analysis and Design Software**

Reflection seismology (or seismic reflection) is a method of exploration geophysics that uses the principles of seismology to estimate the properties of the Earth's subsurface from reflected seismic waves. The method requires a controlled seismic source of energy, such as dynamite or Tovex blast, a specialized air gun or a seismic vibrator, commonly known by the trademark name Vibroseis.
