Best Password Manager & Secure Vault | Keeper Security

Oracle Database Vault enables you to identify the actual privileges and roles that are used at run-time. The additional unused roles and privileges can then be audited or revoked by the security administrators to reduce the attack surface and implement least privilege model.

Introduction to Oracle Database Vault

Tables are the basic unit of data storage in an Oracle Database. Data is stored in rows and columns. You define a table with a table name, such as employees, and a set of columns. You give each column a column name, such as employee_id, last_name, and job_id; a data type, such as VARCHAR2, DATE, or NUMBER; and a width. The width can be predetermined by the data type, as in DATE.

Managing Tables - Oracle

You can connect to a running standalone server or managed domain by using the connect command.. connect. The default host and port configuration is localhost:9990. If the server is listening on a different host and port, then these need to be provided to the connect command.. connect 192.168.0.1:9991
