Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

Evolution - Wikipedia

Evolution is the process of change in all forms of life over generations, and evolutionary biology is the study of how evolution occurs. Biological populations evolve through genetic changes that correspond to changes in the organisms' observable traits. Genetic changes include mutations, which are caused by damage or replication errors in organisms' DNA. ...

Evolution i organismer opstår igennem ændringer i arvelige træk, som er særlige karistika af en organisme. Foreksempel er øjenfarve hos mennesker en arvelig egenskab og en person kan arve brune øjne fra en af deres forældre. Nedarvede træk styres af gener og det komplette sæt af gener i en organismes genom (genetisk materiale) kaldes dens genotype.
