A conventional idea of a sustainable fishery is that it is one that is harvested at a sustainable rate, where the fish population does not decline over time because of fishing practices. Sustainability in fisheries combines theoretical disciplines, such as the population dynamics of fisheries, with practical strategies, such as avoiding overfishing through techniques such as individual fishing ...

During his days as Harvard's influential president, Charles W. Eliot made a frequent assertion: If you were to spend just 15 minutes a day reading the right books, a quantity that could fit on a five foot shelf, you could give yourself a proper liberal education. The publisher P. F. Collier and Son loved the idea and asked Eliot to assemble the right collection of works.
