1. Introduction. Over the last decade growing attention has been paid worldwide to the new concept and development model of Circular Economy, CE, with the aim to provide a better alternative to the dominant economic development model, so called "take, make and dispose" (). The negative effects caused by the latter are threatening the stability of the economies and the integrity of natural ...

Science has made enormous inroads in understanding climate change and its causes, and is beginning to help develop a strong understanding of current and potential impacts that will affect people today and in coming decades. This understanding is crucial because it allows decision makers to place climate change in the context of other large challenges facing the nation and the world.
