Hi Thanks for informative article regarding BICS. I have a question about on premise OBIEE 12 C Is there any other way for on premises OBIEE similar to BI cloud as below?

Configuring the Remote Data Connector (RDC) for OAC or BICS

Set ID enables you to share a set of reference data (eg, payment terms) across many organizations. By dividing the reference data into partitions (Sets) appropriate to the organizational entities that will use the data, Set ID enables you to share control table information and processing options among business units.

Oracle Applications

Once inside the developer console is time to add the apex code below. The URL copied in the previous step needs to replace the red one. The filtering field in Tableau must replace the blue variable and the ID field of Salesforce replaces the green one.
