Thank you so much for succinctly stating what advocates have been discussing with more or less success for years. I believe the bicycle is "The Fountain of Youth" and work every day on skills training, education and compliance with traffic laws so we can ride now, not wait for the perfect bicycle facilities.

A landfill site (also known as a tip, dump, rubbish dump, garbage dump or dumping ground and historically as a midden) is a site for the disposal of waste materials by burial. It is the oldest form of waste treatment (although the burial part is modern; historically, refuse was just left in piles or thrown into pits). Historically, landfills have been the most common method of organized waste ...

The Gateway to Up-To-Date Information on Integrated 'Whole Building' Design Techniques and Technologies. The goal of 'Whole Building' Design is to create a successful high-performance building by applying an integrated design and team approach to the project during the planning and programming phases.. WBDG Updates

WBDG | WBDG - Whole Building Design Guide

Key to the success of a health care construction project is a vetted and approved medical equipment budget. This lays the foundation for the application of practices that may not only save the facility money on medical equipment, but on the entire project cost.

Medical equipment budgeting | HFM

Patterns for circulating supplies and personnel should be scrutinized when developing facilities designs. Several corridor systems, including single, dual, and multiple, each with inherent advantages and disadvantages, can be utilized (Hessler, 1991a). The systems differ with respect to movement of clean and soiled materials as well as personnel with respect to the cagewash area.
