Diamond is a solid form of the element carbon with its atoms arranged in a crystal structure called diamond cubic. At room temperature and pressure, another solid form of carbon known as graphite is the chemically stable form, but diamond almost never converts to it. Diamond has the highest hardness and thermal conductivity of any natural material, properties that are utilized in major ...

A respirator is a device designed to protect the wearer from inhaling particulate matter, including airborne microorganisms, fumes, vapours and gases. There are two main categories: the airpurifying respirator which forces contaminated air through a filtering element, and the air-supplied respirator in which an alternate supply of fresh air is delivered.

Very informative, friendly guide with excellent English. It came to me in the middle of the night, it's called an inkwell !! Back to the tour, I booked two tours on the same day & they arranged the same guide (Raimund) for both which was very handy, albeit worrisome if I didn't like guide.. however Raimund had a solid grasp of Russian history, informatively explaining the timelines in ...

GII is the most progressive and trusted institute in India with a rock solid credibility which is proving enough for diamond graders to use GII's diamond grading reports as bench marks.

#### GII - Gemmological Institute of India

However, if you are discussing, for example, the historical context in which the episode originally aired, you should cite the full date. Because you are specifying the date of airing, you would then use WB Television Network (rather than Mutant Enemy), because it was the network (rather than the production company) that aired the episode on the date you're citing.
