Preamble: Paper-based records have been in existence for centuries* and their gradual replacement by computer-based records has been slowly underway for over twenty years in western healthcare systems. Computerised information systems have not achieved the same degree of penetration in healthcare as that seen in other sectors such as finance, transport and the manufacturing and retail industries.

Electronic Medical Records - openclinical.org
Medical coding is a specialized profession within the wider field of healthcare administration. Professional medical coders review the documentation contained in patients' medical records, then they translate the written documentation into universally accepted, industry-standard medical code.
